Learn To Swim Levels

Parent/Child

This class is designed for children 6 months to 3 years old. One or both parents/guardians participate with their child in supervised activities that help them become more comfortable in the water and strengthen their bond with each other.

Beginner 1

We will be helping students feel comfortable in the water and learn how to enjoy the water safely. Students will learn basic water skills that they can build on as they progress through the other classes. (Exploration)

Beginner 2

This class will give students success with basic skills and teach them to float without support. It will also teach students basic self-help rescue skills. (Basic Skills)

Intermediate

Students will learn to coordinate a front and back crawl stroke. We introduce the elementary backstroke along with the basics of treading water. (Stroke Readiness)

Swimmer 1

This class helps develop confidence in strokes that students have learned in previous classes and will teach new strokes. Students will learn how to perform wall turns, the sidestroke and breaststroke. (Stroke Development)

Swimmer 2

In this class students will be taught coordination and refinement of key strokes. The butterfly will be introduced along with open turns and feet-first surface dives. Increased swimming distances. (Stroke Refinement)

Register online at www.HPARKS.com
or at the Harrisonville
Community Center
