Other Services

Fitness Assessment - \$20

A fitness assessment is a great way to evaluate your current fitness level that can be used as a reference point for improvement after beginning a workout program. Our certified trainers will test you on the 5 components of physical fitness: body composition, cardiovascular endurance, muscular endurance, muscular strength and flexibility.

One hour in length and the trainer will provide recommendations on a fitness program based on your results.

Body Fat Testing - \$5

Knowing your body fat percentage can help you to set realistic & healthy weight loss goals. Testing takes approximately 15-20 minutes with a certified personal trainer.

Free Fitness Orientations

Youth Fitness Orientation

Our youth fitness orientations are designed to educate our young members and guests on the rules and regulations of the cardio and weight equipment here at the HCC. These orientations are required for all youth, ages 9-15 prior to being granted use of the fitness equipment.

Youth ages 9-12 are required to obtain written authorization from the child's physician prior to registration.

Complimentary Fitness Orientation

A fitness orientation is an information session, typically 60 minutes in length, that will provide you with the basics of how to use the weight machines and cardio equipment here at the HCC. You will learn how to start, stop and change settings on the cardio equipment & the proper techniques & usage of the weight machines.

Fitness Orientations are by appointment only.

To schedule an orientation, please contact our Front Desk Associates:

Phone: (816) 380-8980 ext. 5986
